ETHICS - GLOBAL LEARNING and SUSTAINABILITY

OUTLINE

- Ethics
- Sustainability
- Global component

ETHICS - SUSTAINABILITY

- Do not copy any part of your report.
- Mention the existing and already expired patents related to your product. Mention how different your product is.
- Mention if you have or will apply for patent for your product?
- The pollution during the manufacture of your product?
- The environmental issues of the components of the product you developed. Such as lead parts.

ETHICS

- Do not copy any part of your report from other sources.
- Mention the existing and already expired patents related to your product. Mention how different your product is.
  - Google patent
  - Patnetstorm
  - European patent office
- Mention if you have or will apply for patent for your product?

SUSTAINABILITY

- Be sure that there will not be any pollution during the manufacture and operation of your work. Confirm that fact in the report.

- How your product may be recycled at the end of the life of the product you develop?

GLOBAL COMPONENT

- Which university or research institution has made relevant research and what they do?

- Which country makes the best products in this field

- Which companies make the best products in your field? Can you cooperate with them?

- Are there any markets for your product in the other countries?

GLOBAL COMPONENT

- May your product work in the other countries
  - Discuss the power supply (Operational voltage range – Many power supplies work 110-240V in these days)
  - Discuss the plugs (Adapters)
- Do you have proper labels in your own and other languages
  - http://www.freesignage.com/osha_danger_signs.php

UNITS and LANGUAGES

- Did you provide key calculations in US and SI units

- Do you have instruction manuals in at least two languages? Google translate may help you to prepare them in several languages: http://translate.google.com/
